

NEBU

SET THE SCENE.

PICTURE. SOUND. PEOPLE.

nebu.quest

An independent creator studio. A
familiar, expressive visual language.

ONE NAME. ONE SIGNATURE.

NEBU is the product name. The three horizontal bars are the E inside the wordmark, and the compact mark when space is limited.

WRITTEN NAME

NEBU

PUBLIC ADDRESS

nebu.quest

ALWAYS READABLE

Use NEBU in page titles, search, accessible labels and plain text.

ALWAYS THREE BARS

Use the supplied SVG. The E has no vertical stem or rounded ends.

PRODUCT FIRST

Lead with NEBU. Keep a small “by FriskyDev” credit where needed.

THREE BARS. EXACTLY.

CONSTRUCTION

Each bar is 10 units wide and 1.5 units thick. Clear gaps are 1.75 units. Ends stay square; all three bars share one color.

CLEAR SPACE

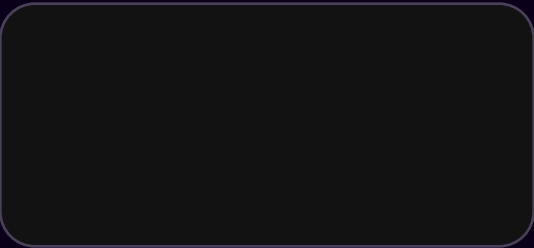

Keep at least one quarter of the cap height clear on every side. Give the wordmark more space in headers and covers.

MINIMUM SIZES

Wordmark: 96 px wide for digital UI. Compact glyph: 16 px, with pixel alignment checked at small sizes. The bar symbol is a brand mark, never a menu button.

DARK GROUND. ELECTRIC SIGNAL.

Directly aligned with the current VC studio. Yellow leads action, cyan connects, violet adds depth, and lime stays a selective energy accent.

Studio ink

#121212 Base & type

Deep violet

#0B001A Page depth

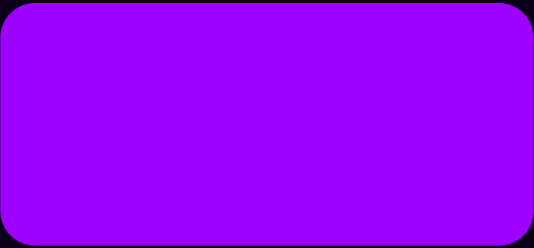

Electric yellow

#FFD100 Primary action

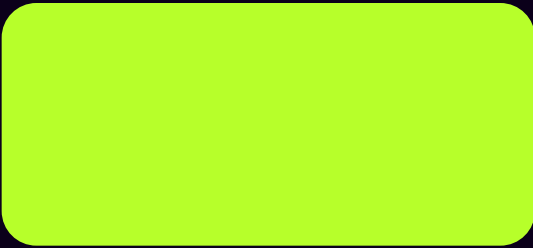

Signal cyan

LOUD HEADLINES. CLEAR CONTROLS.

DISPLAY / BRICOLAGE GROTESQUE 800

SET THE SCENE. MAKE IT YOURS.

Use compact, confident headlines with tight tracking. Keep uppercase for short statements; sentence case for readable explanations.

SCALE

Hero 44-86 px / Section 24-30 px / Body 14-16 px / Compact labels 10-12 px.
Responsive scale follows the existing studio hierarchy.

UI & BODY / MANROPE

Your camera. Your music.
Your room.

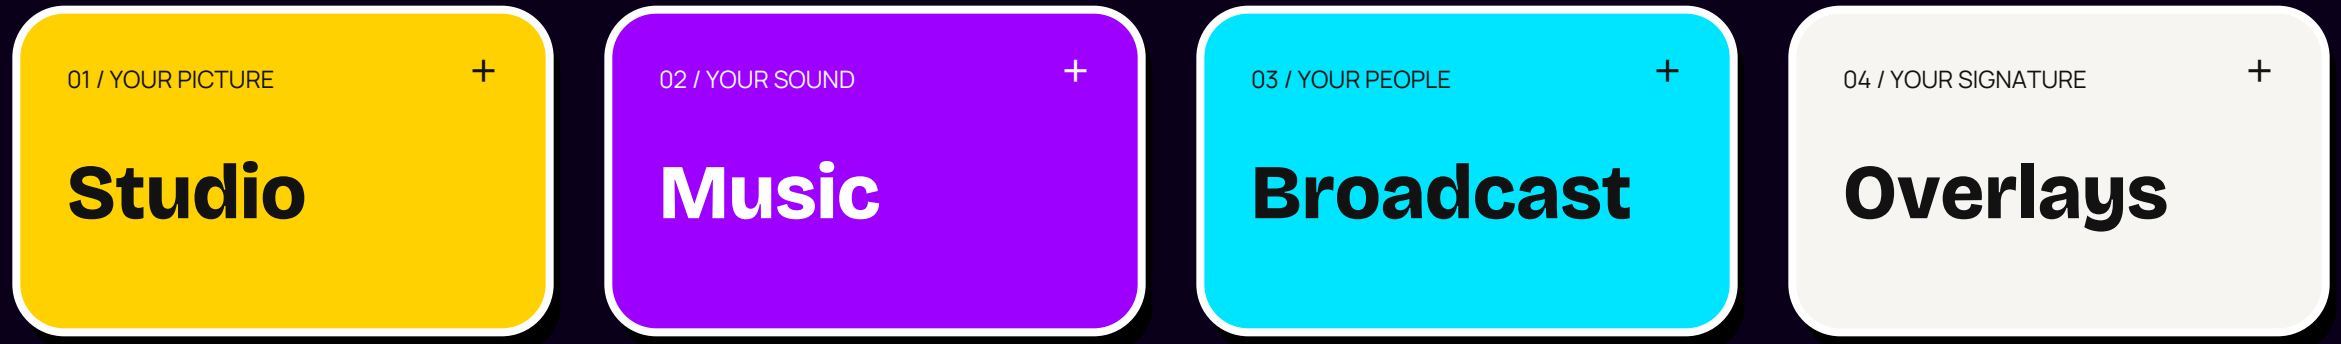

Prepare your output. Bring people in. Keep labels short and instructions close to the control they explain.

UTILITY / SYSTEM MONO

01 / YOUR PICTURE

Use small uppercase utility labels sparingly. Never set long descriptions in all caps.

BUILT LIKE A CONTROL SURFACE.

DISTINCTIVE SURFACES

2-3 px outlines. 16-22 px radii. Firm black offset shadows. Cards feel tactile, with color reserved for meaningful actions.

SPACE TO OPERATE

1320 px maximum canvas. 32 px desktop and 16 px mobile gutters. 24 px section rhythm. Four shortcuts become two columns on mobile.

PURPOSEFUL MOTION

A short lift and slight tilt on hover. Pressed controls move down. Cyan focus stays obvious. Disable transforms and transitions for reduced motion.

Keep the studio hierarchy. Change the brand signature, not the working flow.

CONTRAST IS PART OF THE BRAND.

STATE RULES

Label every state. A color alone never means connected, live, failed or selected. Use dark text on yellow, cyan and lime; use white on violet. Keep focus rings visible against the surrounding surface.

A SIGNATURE THAT TRAVELS.

NEBU

NEBU

NEBU

NEBU

VOICE

Direct, inviting, assured. “Set the scene.” “Your camera. Your music. Your room.” “Prepare your output. Bring people in.” Name the action and report its real state.

THE STUDIO IS THE REFERENCE.

Make it yours.

Your camera. Your music. Your room.
Prepare your output. Bring people in.

KEEP THE SYSTEM TOGETHER.

USE THE SUPPLIED ASSETS

Outlined SVG wordmarks for print and digital. Three-bar SVG marks for compact placements. PNG icons for app installation. CSS and JSON tokens for implementation.

PRESERVE THE IDENTITY

NEBU is always the product name. nebu.quest is the public address. FriskyDev remains the publisher and identity provider where relevant. Never replace provider names inside sign-in controls.

PRESERVE THE DESIGN

Keep the palette, display family, shortcut colors, outlines, shadows and spacing as a single system. Do not add the old neon-green/violet palette or substitute a generic E.

SOURCE & VERSION

Version 1.0 / 09 September 2026. Visual alignment: the live studio at vc.friskydev.com. Name, domain and three-bar E: confirmed by the owner. Glyph proportions: existing NEBU canonical asset.

Bricolage Grotesque and Manrope are distributed under SIL Open Font License 1.1. Font licenses are included in the kit. The brandbook records visual identity; technical integrations keep their existing contracts.
